

Lapcon Door Damper (Surface mounted)

Installation instructions

Read this manual thoroughly for proper and safe installation. Please retain this manual for future reference

- · Sugatsune's warranty is for the product itself and does not extend to the installation as a whole. In case of failure, Sugatsune's liability is limited to the replacement of the products by a similar one.
- $\cdot$  The company is conducting strict check on the products, however, if any defects are found on the
- · The warranty period is one year after the day of shipment. The company's responsibility shall be limited to replacement of the product

#### Installation and usage notices -

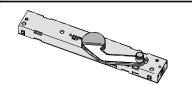

- · This product is for indoor use only. Do not use in locations where it is in direct contact with water.
- · This damper effectiveness maybe lessened when use in an environment subject to strong drafts
- · This damper may not be able to slow down the door if it is closed with excessive force.
- Despite extensive in-house testing, we recommend that you test your installation for proper interaction between the hinge and the LDD damper.
- · The LDD may not pull the door completely closed when using an overly hard latch.
- · Standard temperature of use is 0 to 40 °C.

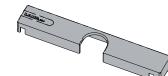

# ●Installation Body Strike This drawing shows a right-hand opening type (LDD-S-R).

#### Product functions and features

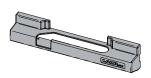

- · This product is a SURFACE MOUNT TYPE door closer damper intended to be applied on the head frame.
- · The damper function reduces door slamming sounds and the door begins to close slowly just before the complete closing and closes completely.
- · Quick and easy to install. Just mount it close to the vertical frame and door stop. (\*Depends on the frame width.)
- $\cdot$  Featured with the function of door-closing power adjustment.
- The strike plate is featured with vertical/horizontal adjustment functions.

### 2.Strike plate installation procedure

### FIG 2

Hinge side mounting frame

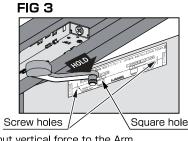

FIG 2-3: 1) Pull the Arm out completely. Do not put vertical force to the Arm.

- 2 Close the door slowly while holding the arm fully open and place the template so that the arm roller fits in the square hole.
- ③ Adjust the template so that it is parallel with the top of the door and mark the screw hole shown on the template

# Proceed with the final adjustment before opening and closing the door.

screws provided.

FIG 4: Fix the strike plate with the installation

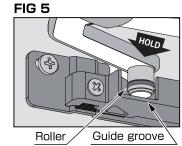

### 3.Adjustments

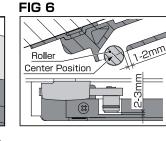

FIG 5-6: Confirm the Arm is completely pulled out. Close the door slowly while holding the arm fully open and check the Roller enters into the guide groove.

If necessary, carry out vertical and/or horizontal adjustments to the strike plate. (See below.)

\*Be sure to keep the Arm position.

Horizontal adjustment screw Horizontal adjustment range: ±3mm Vertical adjustment screw Vertical adjustment range:+3,-2mm

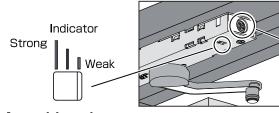

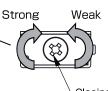

Loosen adjustment screw, adjust strike plate position and re-tighten screw.

Check roller position and adjust further if necessary.

When adjustment is completed, open and close the door several times in order to check proper function of the LDD-S.

## ·Closing power adjustment

E-mail:lamp@sugatsune.com.cn

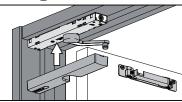

E-mail:lamp@sugatsune.com.cn

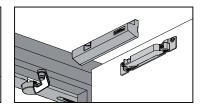

Closing power of the door can be adjusted by turning the Closing power adjustment screw. This only changes the final closing power, not the

damping force of the LDD-S.

Closing power adjustment screw

#### 4. Attaching the covers

Attach the covers for the main unit and the strike plate while keeping the door open.
